

SMOOTH FIBERGLASS PATIO DOOR

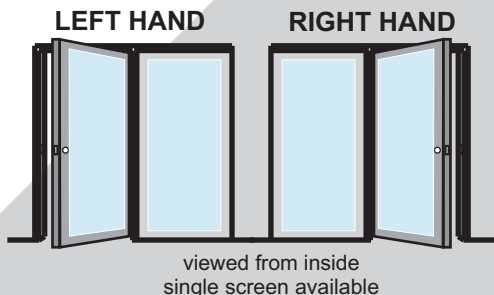

With a Smooth Fiberglass Door Slabs and Composite Jambs, this patio door adds beauty as well as giving you a long lasting product.

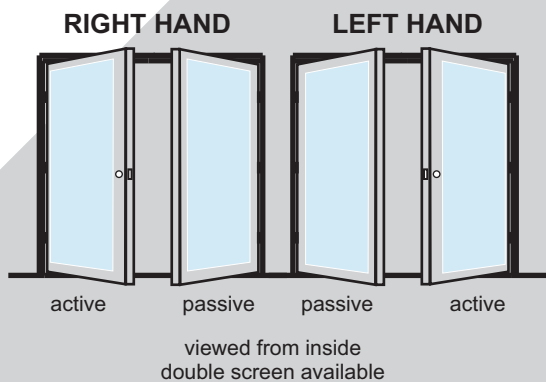

KOMFORT WITH PERFORMANCE

Single Active Double Door Unit

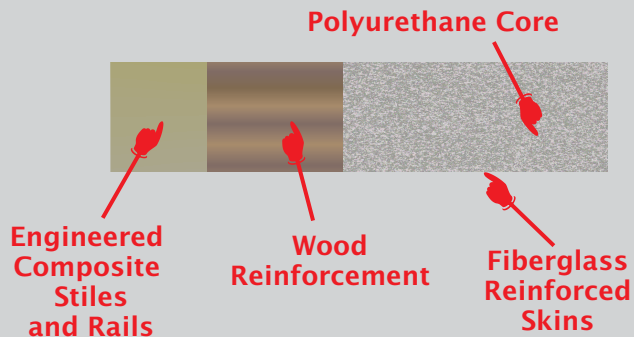

Double Active Double Door Unit

Fiberglass Door

The smooth fiberglass slab is designed to withstand whatever the environment can throw at it.

The door slab has a water resistant smooth fiberglass skin. It is manufactured with composite stiles and rails on all four sides. This allows for no water penetration, making rotting, twisting, or warping a problem no more. The door slab also contains no metal, rust will also not appear. This leaves you with a high performance door with a long lasting, quality appearance.

Composite Jamb

Beauty of wood - Better performance

To have a complete entry system, it is important to consider the material of the door frame. Many doors are hung in either wood or steel frames, which are prone to the same problems as the doors themselves. Wood frames can warp, rot, and crack, while steel frames can rust and dent.

Composite Door Frames offers an alternative to traditional door jambs. The material is durable, long-lasting, and rot and rust resistant. Also is more thermally resistant than wood or steel.
