

# Marquis' Solution Dyed Polyesters

Our solution dyed (SD) polyester fiber are the best solution for today's carpet development technology. With SD carpets, the color goes all the way through the fiber, meaning the color won't fade, wear off, or stain.

Marquis' SD fiber are twisted us a computer controlled system to produce the highest quality construction available in the market. This innovation allows your carpet to hold it's beauty and perform for longer periods.

Marquis Industries began operations in 1997. Over the past 25 years, we have grown to become a national carpet manufacturer and hard surface flooring supplier. Providing value, styling, and service to our flooring dealers. In 2020, Marquis acquired the Lonesome Oak group.

Today, Marquis Industries operates one of the newest and most efficient and integrated carpet mills in the industry. We produce high quality polyester residential cut pile carpet in many styles and colors.

## Carrot vs Radish

Solution Dyed Carpet is like a carrot when cut in half. The color goes all through the fiber.

Traditional dyed carpet is like a radish when cut in half. The color is only on the outside.

### 1. Better color fastness

Solution dyed carpets will have better resistance against sun fading.

### 2. Lifetime Stain Protection

Enhanced stain protection against everyday usage and pets.

### 3. More Durable Fibers

The solution dyed process allows for a more durable lasting carpet against wear.

**Lifetime Fade**

**Lifetime Pet**

**Intell-a-Twist**

**Quality Assurance**
